

Support for the general strategy for brucellosis and tuberculosis control in Turkey

Country: Turkey

Project duration: 2009-2012

The project provided guidance and support for brucellosis and tuberculosis control in Turkey in a collaborative project between the Dutch Ministry of Agriculture, Nature and Food and the Turkish Ministry of Agriculture and Rural Affairs.

Activities included: technical assistance (set up of a base-line survey, sampling and surveillance, vaccination and diagnostics, maintenance of the programme including data collection and epidemiological analysis, cost-benefit analyses and cost-effectiveness); project management (project plan, tasks and responsibilities, quality assurance, reporting, communication); study visits and training.

The project was financed by the Ministry of Economic Affairs and managed by the Agentschap NL
